

Dairyland Offers In-House Mycotoxin Analysis via HPLC – MS/MS

Dairyland is excited to announce that we are now offering HPLC-MS/MS (Gold Standard) mycotoxin testing in-house. With this investment, Dairyland is one of a few truly commercial independent labs in the US that has this capability. Some of the benefits of this technology include:

- Superior accuracy and data consistency, free from false positive or erroneous results that can occur with other methods
- Improved turnaround time for all toxin testing: 2 – 5 days in the laboratory
- One method for all feeds and forages
- All In-house analysis
- Nutrient, mycotoxin and mold data on one report (when applicable)

More information regarding mycotoxin analysis can be found on our [website](#) including: [fact sheets](#), [detection limits](#), and [package details](#).
